

A. R. ENCAMPMENT.

Much Enthusiasm at the Sessions
Held Yesterday.

THE OFFICERS ELECTED.

C. O. FARNSWORTH, COMMANDER
OF THE DEPARTMENT OF UTAH.

Stirling Addresses Made By Com-
mander-in-Chief Lawler, General
Jones and Other Visitors—Dr. HIR's
Address—The Installation Last
Evening.

Yesterday was another auspicious day for the G. A. R. veterans, who, with Commander-in-Chief T. C. Lawler, Adjutant General C. C. Jones and Colonel Sealey, aide de camp on the chief's staff, assembled in the morning at the G. A. R. hall and took part in the thirtieth annual encampment of the Grand Army, department of Utah. Another session was held at 2:30 and the evening session was the installation of the new officials for the Utah department.

The afternoon session at which only a small body of well known veterans were present, was chiefly devoted to the selection of an official staff for this department. The election was made by ballot and resulted in the unanimous choice by the encampment of C. O. Farnsworth as the commander of the Utah department. The other officials decided upon are: M. J. Barrett, of Provo, senior vice-commander; L. D. Stephens, of Ogden, junior vice-commander; J. Milliron, of Salt Lake, medical inspector; Rev. Nauman Hanson, of Murray, chaplain, and as delegate to the national encampment, General E. W. Tarlock, with Colonel Charles Crane as alternate.

The hall was decked in patriotic colors, being stretched with each side across the apartment. Above the platform a large frame was suspended, containing the declaration of independence in national colors. On the right side of the original signatures to the reconstructed instrument. On either side of this hung the busts of General Maxwell and Judge McKean, and a picture of General P. B. Cannon was also conspicuous.

It was about 10 o'clock when the council of administration assembled at the hall. The meeting was devoted to a consideration of the accounts of the assistant adjutant general and assistant quartermaster general, and these were duly approved by the council.

The regular session of the encampment did not begin until 11 a. m., when Department Commander T. C. Lawler, called for order. After prayer by Chaplain W. S. Hawkes, the encampment was declared by the commander to be open for the transaction of business, and Captain Bailey, Rudolph Alf and Colonel Charles Crane were selected as a committee to wait on the national officers and advise them that the encampment was open.

A committee on credentials was appointed by the chair, consisting of the assistant adjutant general and colonels T. Hoffman and J. T. Elliott. When T. C. Lawler, the department commander, then made his address to the veterans. It was a splendid effort and evoked great enthusiasm from the audience. The commander spoke eloquently of the struggles that had been endured and referred in complimentary terms to the valour of the soldiers. Mention was also made of the just act of the government in reducing the amount of persons to a meagre paltry. The commander was constantly interrupted with bursts of applause.

A statistical report was made by the adjutant-general and the quartermaster general made a statement as to the financial standing of the department. Both of the reports were adopted by the encampment. Reports were also rendered by the chaplain and medical director, but these were referred to the committee on credentials consisting of Colonels Wardleigh, Kellogg and Snyder. The encampment was then adjourned until the afternoon.

Afternoon Session.
Promptly at 2:30 the committee appointed to notify the national officers that the encampment was open escorted Commander-in-Chief Lawler, Adjutant General C. C. Jones and Colonel Sealey to the platform and introduced the distinguished officials amid cheers and applause. A motion to have 5,000 copies of the speech printed in pamphlet form for distribution met with the approval of the veterans, and a committee of three was appointed to take the matter in charge.

As a committee on resolutions, Lloyd B. Stephens, A. S. Condon, M. J. Barrett and J. W. Greenman were named by the chair. The resolutions were soon ready and received the approval of the encampment.

Commander-in-Chief Lawler addressed the veterans in a brief but spirited effort, which was full of patriotic allusions. He spoke with commendation of the energy and patriotism of the veterans, and stated that the G. A. R. has become apparent in the South and the veterans will receive there the most candid and fraternal treatment.

General Jones followed in a brief speech, which was devoted chiefly to statistical data. He said that there are 27,000 veterans enrolled on the records at national headquarters and in the list the deaths of old soldiers reached a total of 2,482.

The last feature on the afternoon programme was the election of a corps of officers for the state department.

In the Evening.
The commander-in-chief came together again at 8 o'clock, and this session the impressive ceremonies connected

THE ANIMAL EXTRACTS.

Cerebrine, extract of the brain of the cow, for Nervous Prostration, Insomnia, etc.
Cardine, extract of the Heart, for functional weakness of the heart.
Medulline, extract of the Spinal Cord, for Locomotor Ataxia.
Tellurine, for Premature Decay.
Ovarine, for diseases of women.
Thyroidine, for Kretzema and Impurities of the blood.
Dose 5 Drops. Price \$1.00.
COLUMBIA CHEMICAL CO.,
Send for Book. (154) Washington, D. C.
C. C. M. Institution, Drug Dept., Agents.

gress Opens at London—General
Notes.

The new department commander, C. O. Farnsworth, was the last to be initiated and he was then formally presented with the gavel. As assistant adjutant general the captain T. C. Bailey was also installed in the new position.

Commander-in-Chief Lawler addressed the audience. The speech was patriotic in tone and he said that the younger people present were here to do honor to the men who saved the nation. Through our grand system of education, the young are learning more reverence for their country; they are being taught the songs of liberty, the lessons of patriotism.

These men in civilian's attire are the brave soldiers who struck the shackles from two million slaves, under the leadership of that great patriot, Abraham Lincoln. (Applause) These are the men who followed Grant, Sheridan, Hancock, Logan and a hundred others, and when the last rebel surrender was made at Appomattox, these were the victors of freedom and the saviors of the Union.

After the war many of them became the pioneers of the mighty west. The history of their deeds will yet be sung by many thousands. They are the truest and most patriotic of Americans.

The children will still be trained in the lessons of patriotism until on every school house Old Glory shall proudly float. On the other side of the room, the stars and stripes wave in triumph, and the time will soon arrive when there will be no east, no south, no west, but a grand commonwealth of the United States.

Adjutant General Jones also made an address and was warmly applauded. The entertainment was enlivened by a number of musical and elocutionary selections, most of which exhibited much ability.

Chamberlain family sang a number of popular songs with good effect. Recitations by Miss Edith Crane and Miss Galsena Connell also deserve special mention.

The string strains of "Marching Through Georgia," were rendered in chorus by the audience, led by the Rev. T. C. Cliff.

Colonel Tarlock then presented to Commander-in-Chief Lawler, a handsome case made of Utah mahogany, which had been prepared for use in the Temple, Mr. T. K. Siddham being the clever artisan. Similar presents were given to General Jones and Colonel Sealey. Instead of mahogany, however, the cases contained were of Paradise wood, the material of which cream and cake were served by the relief corps. The evening ended in a pleasant and sociable time. The refreshments which enjoyed the refreshment of the gracious relief corps were in hearty accord with the many eulogies which the ladies received from the veterans and distinguished visitors.

BOARD OF PUBLIC WORKS.
Matters of Importance Considered at the Meeting Yesterday.

An important meeting of the board of public works was held yesterday at which the matter of the construction of the extra 20 feet of the gravity sewer from the corner of Fifth and Main streets was considered. It was at first thought that the sewer could be made to conform to the sewer already in place, but at the meeting it was decided the city do not have the funds to do so.

The bond of Frank Langman, who has secured the contract for erecting the fence on the sewer line north of the Warm Springs, in the sum of \$800 with Messrs. Purker & Deane as sureties, was accepted and approved.

The matter of the permitting of the electric light company to replace pavement torn up in setting poles came up. It appears that the city has agreed with the contractors to replace all pavements and when any is taken up the parties doing the work have to make a deposit of the amount charged per square yard.

The Salt Lake and Ogden company has refused to take any more interest in the proposed line, but the board has decided that it will not; the matter will be left to the company which will have to take out permits and make the deposit as usual.

Conflicting claims as to the citizens' company, but as the Rapid Transit company put down the pavement the city was forced to take action with it and ascertain its ideas upon the subject.

Why Have You Been stricken with disease while your neighbor escaped, or vice versa? Both were alike exposed, but in one case the disease germs lodged in the impure blood and weakened system, while in the other, the blood was kept pure by Hood's Sarsaparilla, and the body was in a condition of good health.

Hood's Pills are purely vegetable and do not purge, pain or gripe. Sold by all druggists.

WEATHER AND CROPS.
Observer Smith's Weekly Summary of the Reports.

Following is Observer Smith's weekly summary of the weather and crop reports:
Weather.—The temperature, except on the 16th and 17th, has been above the normal, with an abundance of sunshine. Several frosts have been reported, resulting in great damage to the grain and vegetable crops throughout the northern portion of the territory. There was no precipitation reported from any section during the week.

Crops.—The frosts and freezing weather at the close of the preceding week were very destructive to the grain and vegetable crops throughout the northern portion of the territory. Potatoes, corn and all tender vegetation were frozen, and the ground was so hard and headed out was seriously damaged, and a great deal of the fruit entirely destroyed. Straw wheat was not injured enough advanced to be hurt much. In the southern portion of the territory the crops sustained but little or no injury from the recent cold wave.

The last four days of the past week were warm and clear, with a fair amount of sunshine but no precipitation. These conditions were favorable to all crops, especially potatoes, which are rapidly ripening from the effect of the cold snap. The first cutting of lucern is progressing in the northern portion with high yields in many sections on account of frost and cut worms. In the southern portion a heavy frost has been reported, and hoppers and cut worms are doing considerable damage to the lucern and vegetable crops of Lucerne, Utah. Several correspondents report that the streams are getting low and that there will be a scarcity of water for stock and irrigating purposes. The ranges begin to show signs of the need of moisture.

Dr. Tillman fills teeth without pain.

Notes.

The railroad men's meeting held last evening at Armstrong's hall, corner of Second South and Third West streets, in the interests of the proposed San Diego, Pacific & Eastern railway, was attended by a goodly number of railway men, many of whom subscribed for stock.

Gilbert McLean, Union Pacific engineer, was made chairman, and J. W. Murphy acted as secretary.

The chairman, in a few well-chosen words, introduced President George W. Vroman, who at once proceeded to unfold all plans as proposed to date, and to give to the men a clear understanding of just how and when stock subscriptions would be collected and applied in building operations.

After making a careful review of labor's past struggles, the utility of strikes, and the necessity of union and cutting Utah as a shining example of what can be accomplished by such united methods, he proceeded to show how the proposed new railroad—a railroad men's road—could be made the embodiment of good to humanity and the public.

In brief, he said that instead of being over-capitalized, say at \$4,000,000, it would be given a capital of \$2,000,000, and dividends would be paid regularly. The people of San Diego had guaranteed to build the road, and the company would grant all needed terminal facilities, as well as ample wharf privileges bordering on the coast.

The road as a carrier would be successful in every particular. It would already given right of way through the city for the S. D. P. & E. railway, and would be built on the right of way. It had traversed much of the proposed route northeast from San Diego, and but little more than 40 miles from there were the famous Utah coal fields cropping out for twenty miles, with veins in thickness from 10 to 20 feet, equal to the Pennsylvania fields. There were also Utah's great iron deposits, wonderful to behold. The road as a carrier would be successful in every particular.

The road as a carrier would be successful in every particular. It would already given right of way through the city for the S. D. P. & E. railway, and would be built on the right of way. It had traversed much of the proposed route northeast from San Diego, and but little more than 40 miles from there were the famous Utah coal fields cropping out for twenty miles, with veins in thickness from 10 to 20 feet, equal to the Pennsylvania fields. There were also Utah's great iron deposits, wonderful to behold. The road as a carrier would be successful in every particular.
